Indications for use: MiSight® 1 day (omafilcon A) soft (hydrophilic) contact lenses for daily wear are indicated for the correction of myopic ametropia and for slowing the progression of myopia in children with non-diseased eyes, who at the initiation of treatment are 8–12 years of age and have a refraction of −0.75 to −4.00 diopters (spherical equivalent) with ≤ 0.75 diopters of astigmatism. The lens is to be discarded after each removal.
Indications for use: MiSight® 1 day (omafilcon A) soft (hydrophilic) contact lenses for daily wear are indicated for the correction of myopic ametropia and for slowing the progression of myopia* in children with non-diseased eyes, who at the initiation of treatment are 8–12 years of age and have a refraction of −0.75 to −4.00 diopters (spherical equivalent) with ≤ 0.75 diopters of astigmatism. The lens is to be discarded after each removal. **Compared to a single vision 1 day lens over a 3 year period.

The Brilliant Futures™ Myopia Management Program is a comprehensive approach to myopia management built around MiSight® 1 day contact lenses, the first and only contact lens FDA-approved to slow the progression of myopia* in children age 8–12 at initiation of treatment.** This program is designed to fit busy lifestyles and offer you and your child the support you need to succeed. It includes:

- An annual supply of MiSight® 1 day daily disposable lenses
- Free shipping and free returns, including prescription changes
- Program transparency; office visits outlined for the entire year
- Access to online support tools
- A mobile app with education resources and appointment reminders

MYOPIA - A GROWING CONCERN

Myopia is more commonly referred to as nearsightedness, or the inability to see objects clearly at a distance. Myopia is on the rise — in its frequency and its severity. The reason for its escalation has been linked to two factors:

- **Genetics**
  - Children with one or two myopic parents are more likely to be myopic.4

- **Lifestyle**
  - Children who spend more time on activities like reading or using handheld devices instead of spending time outdoors are more likely to become myopic.4

CooperVision®
A REVOLUTIONARY CONTACT LENS

MiSight® 1 day is a soft contact lens that uses ActivControl™ Technology to slow the elongation of the eyes. ActivControl™ Technology simultaneously corrects a child's vision while training the eye to resist growing in length.

MISIGHT® 1 DAY CONTACT LENSES ARE BACKED BY CLINICAL DATA

In clinical trials, MiSight® 1 day contact lenses were shown to slow the progression of myopia in children (8-12 years of age at the initiation of treatment) in two ways:

59% average reduction in prescription change with MiSight® 1 day lenses*
52% reduction in eye lengthening with MiSight® 1 day lenses*

CHILDREN WHO TRIED MISIGHT® 1 DAY LOVED THEIR LENSES

Children who began treatment between the ages of 8 and 12 participated.

90% of children continued to express a strong preference for MiSight® 1 day contact lenses over their glasses at the 5 year visit**
OVER 90% of parents whose children were wearing MiSight® 1 day or Proclear® 1 day during a 3-year study, rated their children ‘happy’ with the overall experience of wearing contact lenses†

More than just vision correction, myopia management with MiSight® 1 day contact lenses can help keep your child’s future brilliant.

• Correct distance vision immediately§
• Can slow myopia progression during their growing years†
• Offers a comfortable wearing experience§
• Allows you to avoid the worry of losing or breaking glasses
• Accommodate a more active lifestyle§
• Provides children who wear contact lenses a significantly better quality of life than children wearing glasses, especially regarding athletics and appearance§

**How much do you like wearing your contact lenses?” 87/97 (90%) Top box ‘I like contact lenses the best’ Subjective response @60M
†Overall experience as defined as children's comfort, vision, lens handling, and freedom from spectacles. Children aged 8-15 years.
§Subjective experience with MiSight® 1 day lenses
